

## **October 2019 revision to the NSW Service and Installation Rules**

I write in relation to the October 2019 edition of the Service and Installation Rules of NSW (the Rules) recently revised by the Service and Installation Rules Management Committee. Listed below is a summary of the amendments. A copy of the Rules can be viewed on the Department's web site at

<https://energy.nsw.gov.au/government-and-regulation/legislative-and-regulatory-requirements/service-installation-rules>

Please feel free to distribute this information further in an effort to reach as wide an audience as possible.

The revised Rules may be applied now.

Should you have any further enquiries, contact your local distributor.

### **1.9 Definition**

Added definition of Distributed Energy Resources Register (DER Register).

### **1.17.16 Connection points remain separate**

Added new clause to clarify that connection points must remain separate.

### **8.5 Requirements for Generator Parallel Operation**

Included new text to outline requirements from 1 December 2019 relating to Australian Energy Market Operator (AEMO) DER Register.

### **8.6.1 Small Scale Parallel Customer Generation (via Inverters)**

Included new text to outline requirements from 1 December 2019 relating to Australian Energy Market Operator (AEMO) DER Register.

### **Other minor amendments**

Amendments to correct heading at 4.7.3, page numbering, spelling errors, Departmental change of name.

Kathy Staggs  
Convenor, Management Committee
