

Stephen Procter, Strategic Delivery Manager, Sustainability Programs Energy,
Climate Change and Sustainability NSW Department of Planning, Industry and Environment
sustainability@environment.nsw.gov.au

Dear Stephen,

Thank you for the opportunity to provide feedback on the proposed rule change for the ESS. Our submission focuses on the installation of high efficiency refrigeration for businesses.

If required by DPIE, SKOPE can provide further relevant technical or commercial data.

SKOPE requests that its submission be kept confidential:

- Since the changes implemented as of 1st August 2022, we have closed all activity in the scheme for our Food Service customers (customers that typically purchase one or a few cabinets). This is due to the significant reduction in the energy efficiency index (EEI) for baselines, it is no longer viable to operate.
- Prior to 1st August 2022 we were very active in the scheme, however, since then we have had no activity.
- We are actively trying to participate with our Corporate Beverage customers (customers that typically purchase larger quantities and manage a fleet). However, there are no current options for replacing refrigerated cabinets at a fleet level instead of on a job level.
- We continue to request that the scheme allows both GEMS registrations under the New Zealand and Australian determinations.

Kind Regards,

Edward Johnson
Business Process Analyst
